SONY

DCC-NWFMT1

FM Modulator & car charger adapter for Walkman® Players w/ a "WM-Port"

- Selectable Frequency from Full-range of FM broadcasting (88.1-107.9 MHz) allows you to use a frequency that may not be in use by local radio stations.
- Digital tuning assures for a more stable and clear sound
- 4 programmable direct access memory buttons allow you to easily select the FM frequency you might wish to use while driving through differing radio station coverage areas
- Compatible with Walkman® player models that have the "WM-Port" and allows you to charge those selected players while you drive and listen to them (not all players can support simultaneous playback and charge).

Specifications
